List of Contents

NUMBER 1–3

ix Preface

J.R. Albritton and **B.G. Wilson** 1 NLTE ionization and energy balance in high-Z laser-plasmas including two-electron transitions

S. Alexiou, R.W. Lee, S.H. Glenzer and **J.I. Castor** 15 Analysis of discrepancies between quantal and semiclassical calculations of electron impact broadening in plasmas

L. Aschke, S. Depierreux, K.G. Estabrook, K.B. Fournier, J. Fuchs, S. Glenzer, R.W. Lee, W. Rozmus, R.S. Thoe and **P.E. Young** 23 Towards an experimental benchmark for aluminum X-ray spectra

J.E. Bailey, J. Asay, M. Bernard, A.L. Carlson, G.A. Chandler, C.A. Hall, D. Hanson, R. Johnston, P. Lake and **J. Lawrence** 31 Optical spectroscopy measurements of shock waves driven by intense z-pinch radiation

A. Bar-Shalom, J. Oreg and **M. Klapisch** 43 Recent developments in the SCROLL model

C. Bauche-Arnoult, J. Bauche and **J.-F. Wyart** 57 Effects of the exchange Slater integrals on the shapes of transition arrays

M.E. Beer, P.K. Patel, S.J. Rose and **J.S. Wark** 71 Calculations of the modal photon densities and gain in a K/Cl resonantly photopumped X-ray laser

E. Behar, R. Doron, P. Mandelbaum, J.L. Schwob and **V.L. Jacobs** 83 Electron density dependence of dielectronic recombination in highly ionized atoms

T. Blenski, A. Grimaldi and **F. Perrot** 91 A superconfiguration code based on the local density approximation

M. Busquet and **Ph. Cossé** 101 "Red wing" transition arrays

0022-4073/00/$ - see front matter © 2000 Published by Elsevier Science Ltd. All rights reserved.

A. Calisti, S. Ferri, R. Stamm, B. Talin, R.W. Lee and **L. Klein** 109 Discussion of the validity of binary collision models for electron broadening in plasmas

C. Chenais-Popovics, F. Gilleron, M. Fajardo, H. Merdji, T. Mißalla, J.C. Gauthier, P. Renaudin, S. Gary, J. Bruneau, F. Perrot, T. Blenski, W. Fölsner and **K. Eidmann** 117 Radiative heating of B, Al and Ni thin foils at 15–25 eV temperatures

H.-K. Chung, D.H. Cohen, J.J. MacFarlane, J.E. Bailey, P. Wang and **G.A. Moses** 135 Statistical fitting analysis of Stark-broadened optically thick Ar II spectra measured in ion beam transport experiments

S.J. Davidson, K. Nazir, S.J. Rose, R. Smith and **G.J. Tallents** 151 Short-pulse laser opacity measurements

R. Doron, E. Behar, P. Mandelbaum and **J.L. Schwob** 161 A two-step collisional-radiative model for interpreting spectra originating from autoionizing levels

K. Eidmann, A. Saemann, U. Andiel, I.E. Golovkin, R.C. Mancini, E. Andersson and **E. Förster** 173 Generation of hot plasma at solid density by high-contrast ultra-short laser pulses

R.C. Elton, J.A. Cobble, H.R. Griem, D.S. Montgomery, R.C. Mancini, V.L. Jacobs and **E. Behar** 185 Anomalous satellite-line intensities from a TRIDENT laser-produced plasma

Ch.K. Erber, K.N. Koshelev and **H.-J. Kunze** 195 Time development of Mg micropinches in a low-inductance vacuum spark discharge

G. Faussurier 207 Density-functional theory and average-atom model formulated in terms of functional integrals

C.J. Fontes, J.Abdullah Jr., R.E.H. Clark and **D.P. Kilcrease** 223 Non-LTE modeling of gold plasmas

M.E. Foord, S.H. Glenzer, R.S. Thoe, K.L. Wong, K.B. Fournier, J.R. Albritton, B.G. Wilson and **P.T. Springer** 231 Accurate determination of the charge state distribution in a well characterized highly ionized Au plasma

P. Gallant, Z. Jiang, C.Y. Chien, P. Forget, F. Dorchies, J.C. Kieffer, H. Pépin, O. Peyrusse, G. Mourou and **A. Krol** 243 Spectroscopy of solid density plasmas generated by irradiation of thin foils by a fs laser

S.H. Glenzer, K.G. Estabrook, R.W. Lee, B.J. MacGowan and **W. Rozmus** 253 Detailed characterization of laser plasmas for benchmarking of radiation-hydrodynamic modeling

I.E. Golovkin and **R.C. Mancini** 273 High-order satellites and plasma gradients effects on the Ar He_β line opacity and intensity distribution

H.R. Griem and **Yu.V. Ralchenko** 287 Electron collisional broadening of isolated lines from multiply-ionized atoms

D.A. Haynes Jr., C.F. Hooper Jr., N.D. Delamater, G.D. Pollack, C. Barnes, D.L. Tubbs and **P. Jaanimagi** 297 Chlorine K-shell spectroscopy of directly driven cylindrical implosions

C.A. Iglesias, F.J. Rogers, R. Shepherd, A. Bar-Shalom, M.S. Murillo, D.P. Kilcrease, A. Calisti and **R.W. Lee** 303 Fast electric microfield distribution calculations in extreme matter conditions

V.L. Jacobs and **E. Behar** 317 Dielectronic recombination satellite transitions in dense plasmas

T. Kawamura, K. Mima and **F. Koike** 333 Analysis of highly excited states of dopant Ar in dense hydrogen plasmas and contribution of higher order satellite lines

D.P. Kilcrease and **M.S. Murillo** 343 The ion electric microfield gradient joint probability distribution function for dense plasmas

S.H. Langer, H.A. Scott, M.M. Marinak and **O.L. Landen** 353 Towards a complete model of 3D line emission from ICF capsules: results from the first 3D simulations

A. Maksimchuk, M. Nantel, G. Ma, S. Gu, C.Y. Côté, D. Umstadter, S.A. Pikuz, I.Yu. Skobelev and **A.Ya. Faenov** 367 X-ray radiation from matter in extreme conditions

G. Faussurier and **R.M. More** 387 NLTE steady-state response matrix method

Y. Ochi, K. Fujita, I. Niki, H. Nishimura, N. Izumi, A. Sunahara, S. Naruo, T. Kawamura, M. Fukao, H. Shiraga, H. Takabe, K. Mima, S. Nakai, I. Uschmann, R. Butzbach and **E. Förster** 393 Time- and space-resolved X-ray spectroscopy for observation of the hot compressed core region in a laser driven implosion

E. Oks 405 A new spectroscopic effect resulting in a narrowing of hydrogen lines in dense plasmas

A. Bar-Shalom, J. Oreg and **M. Klapisch** 415 The effect of configuration interaction on relativistic transition arrays

P.K. Patel, E. Wolfrum, O. Renner, A. Loveridge, R. Allott, D. Neely, S.J. Rose and **J.S. Wark** 429 X-ray line reabsorption in a rapidly expanding plasma

N.K. Podder, E.J. Clothiaux and **E. Oks** 441 A method for density measurements employing an asymmetry of lineshapes in dense plasmas and its implementation in a vacuum spark discharge

C. Quoix, G. Hamoniaux, A. Antonetti, J.-C. Gauthier, J.-P. Geindre and **P. Audebert** 455 Ultrafast plasma studies by phase and amplitude measurements with femtosecond spectral interferometry

D. Riley, N.C. Woolsey, D. McSherry and **E. Nardi** 463 X-ray scattering from a radiatively heated plasma

S.J. Rose 471 The inclusion of Compton scattering in line radiation escape factors

F.B. Rosmej, U.N. Funk, M. Geißel, D.H.H. Hoffmann, A. Tauschwitz, A.Ya. Faenov, T.A. Pikuz, I.Yu. Skobelev, F. Flora, S. Bollanti, P.Di. Lazzaro, T. Letardi, A. Grilli, L. Palladino, A. Reale, G. Tomassetti, A. Scafati, L. Reale, T. Auguste, P. D'Oliveira, S. Hulin, P. Monot, A. Maksimchuk, S.A. Pikuz, D. Umstadter, M. Nantel, R. Bock, M. Dornik, M. Stetter, S. Stöwe, V. Yakushev, M. Kulisch and **N. Shilkin** 477 X-ray radiation from ions with K-shell vacancies

A. Sasaki, T. Utsumi, K. Moribayashi, T. Tajima and **H. Takuma** 501 Development of a collisional radiative model of X-ray lasers

P. Sauvan, E. Leboucher-Dalimier, P. Angelo, H. Derfoul, T. Ceccotti, A. Poquerusse, A. Calisti and **B. Talin** 511 Spectral line shapes using the dicenter approach for dense, hot plasmas: hydrogen and helium-like lines

F.J.D. Serduke, E. Minguez, S.J. Davidson and **C.A. Iglesias** 527 WorkOp-IV summary: lessons from iron opacities

J.E. Touma, E. Oks, S. Alexiou and **A. Derevianko** 543 Review of the advanced generalized theory for Stark broadening of hydrogen lines in plasmas with tables

N.C. Woolsey, C.A. Back, R.W. Lee, A. Calisti, C. Mossé, R. Stamm, B. Talin, A. Asfaw and **L.S. Klein** 573 Experimental results on line shifts from dense plasmas

NUMBER 4

X. Zeng, L. Zhang and **Y. Li** 579 Effects of non-equilibrium radiative transfer and opacity on the implosion of capsule filled DT gas

P.B. Abdallah and **V. Le Dez** 595 Temperature field inside an absorbing–emitting semi-transparent slab at radiative equilibrium with variable spatial refractive index

F.M. Schulz and **K. Stamnes** 609 Angular distribution of the Stokes vector in a plane-parallel, vertically inhomogeneous medium in the vector discrete ordinate radiative transfer (VDISORT) model

V.F. Golovko 621 Dispersion formula and continuous absorption of water vapor

G. Bertuccelli, H.O. Di Rocco and **H.F. Ranea-Sandoval** 645 Temperature and electron density gradient in Xe laser produced plasmas, by spectral analysis

V.P. Solovjov and **B.W. Webb** 655 SLW modeling of radiative transfer in multicomponent gas mixtures

F. Kiriyama and **B.S. Rao** 673 Electric dipole moment function of $^{12}C^{16}O$

Y.-X. Hu, B. Wielicki, B. Lin, G. Gibson, S.-C. Tsay, K. Stamnes and **T. Wong** 681 δ-Fit: a fast and accurate treatment of particle scattering phase functions with weighted singular-value decomposition least-squares fitting

691 Erratum

NUMBER 5

P. Gabriel, G.L. Stephens and **I.L. Wittmeyer** 693 Adjoint perturbation and selection rule methods for solar broadband two-stream fluxes in multi-layer media

J.J. Camacho, J. Santiago, A. Pardo, D. Reyman and **J.M.L. Poyato** 729 Analysis and transition probabilities of the $B^1\Pi_u \rightarrow X^1\Sigma_g^+$ band system of Na_2 excited by the 4579 Å Ar^+ laser line

D. Benredjem, A. Sureau, M. Cornille and **J. Dubau** 751 New modeling of germanium soft-X-ray lasers using extended atomic data

J.E. Morel 769 Diffusion-limit asymptotics of the transport equation, the $P_{1/3}$ equations, and two flux-limited diffusion theories

E. Becker and **J. Notholt** 779 Intercomparison and validation of FTIR measurements with the Sun, the Moon and emission in the Arctic

NUMBER 6

V. Le Dez, R. Vaillon, D. Lemonnier and **M. Lallemand** 787 Conductive–radiative coupling in an absorbing–emitting axisymmetric medium

F. Bredice, M. Raineri, J.R. Almandos, M. Gallardo and **A.G. Trigueiros** 805 Weighted oscillator strengths for Kr IV spectrum

V.F. Golovko 821 Hypothetical dispersion quantum effects for coherent forward propagating radiation in transparent and semi-transparent medium

C. Cecchi-Pestellini, L. Barletti, S. Aiello and **A. Belleni-Morante** 835 Mathematical methods for photon transport in random media

J.P. Bardet, J.C. Valognes and **Y. Vitel** 853 Complement to Stark broadening study of neutral He(I) spectral lineshapes in dense cold plasmas ($1.0\times10^{17}\,\mathrm{cm}^{-3} < N_e < 1, 6\times10^{18}\,\mathrm{cm}^{-3}, 20\,000\,\mathrm{K} < T_e < 30\,000\,\mathrm{K}$)

N.V. Voshchinnikov, V.B. Il'in, Th. Henning, B. Michel and **V.G. Farafonov** 877 Extinction and polarization of radiation by absorbing spheroids: shape/size effects and benchmark results
